

Notice - FOR A BOWLESS CELLIST

	A thin line indicates weak left hand pressure on the four strings. A thick line indicates strong left hand pressure on the four strings.
	The clear dots indicate light and rapid touches on the four strings in a random alternating motion with the right hand fingertips. The goal isn't to produce a clear sound but rather a faint evocation. As the dots get darker, keep the same motion but fade to pizzicati. As the dots get bigger, add more intensity.
	This sign indicates an artificial harmonic on the string corresponding to the roman numeral below the dots. The thick line indicates strong left hand pressure. The line with the white square sign indicates harmonic pressure. The interval of the artificial harmonic (between the thick line and the line with the white square) should always be a major fourth.
	The spacing of the lines indicates speed. As the spacing gets smaller, speed increases, as the spacing gets larger, speed decreases. The same applies for curved lines, that means that left and right hands may not have the same speed pacing throughout the piece.
	Isolated dots indicate Pizzicati on the string corresponding to the roman numeral below. The bigger dot should be played as loud as possible (snap it against the fingerboard).
